MEMORANDUM

To: Members of the Board of Education

From: Jack R. Smith, Superintendent of Schools

Subject: Bethesda-Chevy Chase High School Parking Capacity (07-29-19-03-A)

During the Charles W. Woodward High School Reopening Update discussion, Board members requested the following information:

Question

Ms. Silvestre requested information regarding the number of parking slots at Bethesda-Chevy Chase High School. How many are available in the parking structure that was created? How many surface parking spaces are available?

Response

The Bethesda-Chevy Chase High School addition project included the construction of an elevated tennis deck as a strategy to maintain the required number of tennis courts and to increase the amount of surface parking on the school site. The elevated tennis structure provides the school with 6 regulation size tennis courts and associated spectator areas, while allowing for 137 parking spaces on the surface below. In total, this 2,400 student capacity school now has 314 parking spaces to serve staff and students. Parking capacity now is increased by 56 spaces more than the previous parking configuration.

If you have any questions please contact Dr. Andrew M. Zuckerman, chief operating officer, at 240-740-3050.
