

Suggested SERT Field Trips for Secondary Schools

Dickerson Generating Station

This plant generates its power from burning coal, as is the case in over 60% of the power plants in the US. They process over 5,000 tons of coal per day, which comes in via CSX railcar. Power plant tours are available for groups up to 35 at a time.

21200 Martinsburg Road
Dickerson, Maryland 20842

(301) 601-6560

Covanta Energy- Montgomery County Resource Recovery Facility

Waste-to Energy: The Covanta plant converts waste to energy. The proximity to the Dickerson Generating Station, makes this a convenient pairing for a one-day field trip.

21204 Martinsburg Road Dickerson, MD 20842

(301)916-3031

Marian Koshland Science Museum of the National Academy of Sciences

Uses engaging, interactive exhibits to bring to life current science that impacts peoples lives today.

6th & E Streets, NW, Washington www.Koshland-Science-Museum.org

(202) 334-1201

Merrill Center Education Center While experiencing the natural surroundings, students will survey the flora and fauna that make up an ecosystem's biodiversity. The Merrill Center building itself is a model of 'green' architecture and has won a Platinum Award from the U.S. Green Building Council. It is an exemplar of the minimal impact that even large-capacity office buildings can have on the environment.

Annapolis Maryland
