

January 6, 2023

Dear Brooke Grove Families,

Happy New Year! We had a great first week back at The Grove. We received a “technology refresh” and each classroom received a new Boxlight Interactive Display Panel to replace the old Promethean Board projector system. These display panels are brighter and provide enhanced and updated technology for teachers to use for instruction and collaboration. The students and staff are enjoying learning the new technology!

Thank you for your commitment to health and safety at Brooke Grove. We had four cases of COVID identified by parents testing students before returning back to school and possibly spreading the virus. We are so appreciative that our community is so caring and collaborative. Please let us know if you need more test kits at home. We will send another set of test kits home to all students soon.

Please see the attached newsletter for more information and updates. Thank you for all you do and have a wonderful weekend!

Warmly,

Jolynn Tarwater, Principal

Brooke Grove Elementary
