Native American
Heritage Day

ELA

In ELA this month, we are diving into Unit 2 and will be exploring the question, *"How do we reveal ourselves to others?"* As we explore this topic, students will read and compare characters in fables, fairy tales, myths, and fantasies to analyze their actions and reactions. We will look at characters and identify their character traits based on their actions. We will also look at the results of their actions and make inferences. We will be writing our own fables during this unit.

Math

In Math, this month, we will use place value understanding and visual representations to solve multiplication and division problems with multi-digit numbers. We are working on Unit 3. Please have your child practice their multiplication facts up to 12.

Science & Social Studies

In **Science**, we will continue to study energy as well as develop a model to describe how light reflecting from objects and entering the eye allows objects to be seen.

In **Social Studies**, we will learn that people must make choices because resources are limited relative to economic wants for goods and services in Maryland, past and present. Also, students will identify the opportunity cost of economic decisions made by individuals, businesses, and governments.

Reminders: Please have your child bring their Math Books, Agenda Book and Communication Card each day
