Is your child excited by technology and building things? They'll love **Builder's Club: Code and Create!** This hands-on program introduces kids to the exciting world of coding and robotics while also incorporating fun building projects.

**They'll learn to program robots, explore coding concepts, and see their code come to life through interactive challenges.** Along the way, they'll combine computer programming with hands-on engineering, designing and testing real projects. This unique experience builds problem-solving, creativity, and teamwork skills—all while sparking a passion for STEM. A perfect way for kids to develop valuable skills for the future in a fun and engaging way!

**STEM**
