

AGGOPPE

Research

Model

Ask Questions

- . Identify your research problem or question
- . Read about the issue
- . Analyze the problem and develop questions

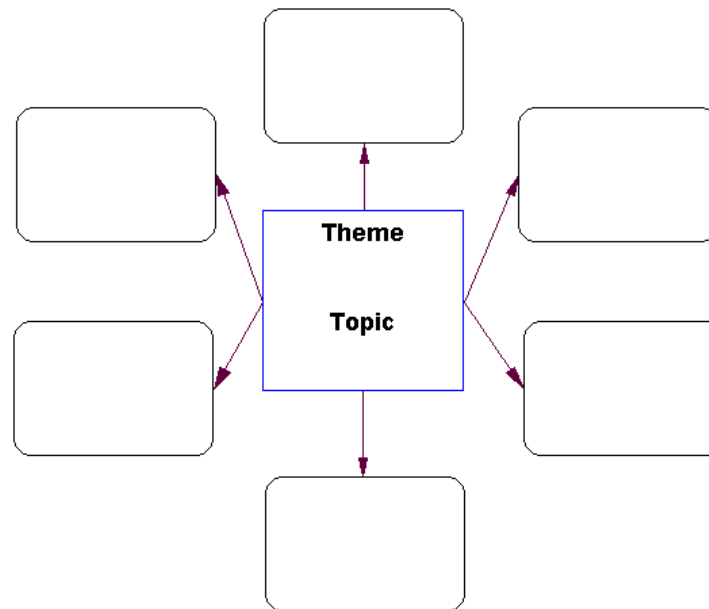

Gather Information

- . **Gather keywords based on questions**
- . **Choose the best source of information (books, Internet, etc.)**
- . **Search for the information**
- . **Record notes and bibliographic information**

Organize Information

- . Summarize your findings
- . Draw conclusions and inferences
- . Use a graphical organizer to arrange the information

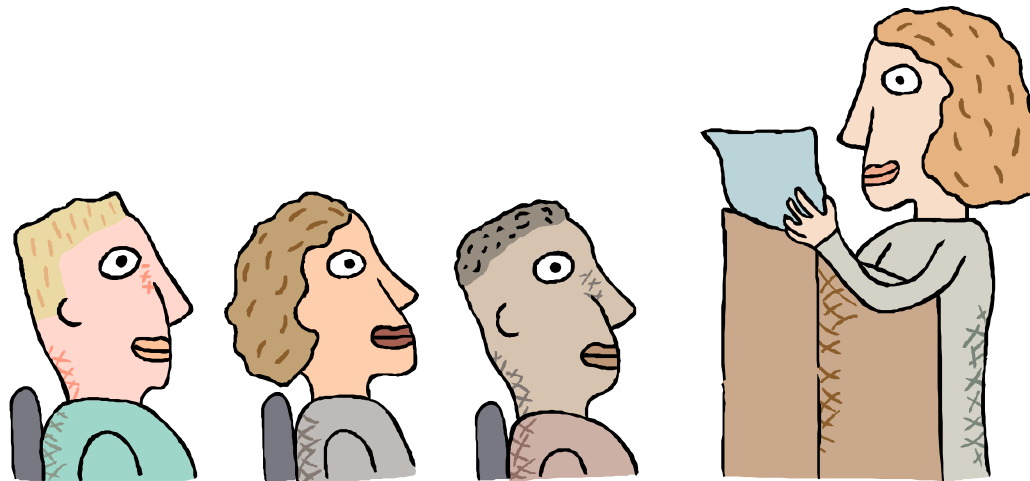

Prepare Information

- . **Decide the best way to use to communicate the information**
- . **Prepare a first draft**
- . **Prepare a bibliography**

Present Information

- . **Revise your first draft**
- . **Prepare your final product**
- . **Present the product to your audience**

Evaluate Information

- Evaluate your process and your product.
- What would you do the same next time?
- What would you do differently?
